PROFESSIONAL SUMMARY

Tech Lead & Senior Full Stack Engineer with 9+ years of experience architecting and delivering scalable web and mobile applications. Proven track record of leading high-performing teams and building robust systems using Laravel, Vue.js, React, and modern cloud infrastructure.

Expert in end-to-end system design, from architecture and API development to deployment and optimization. Passionate about leveraging automation (n8n) and AI technologies (OpenAI) to streamline workflows, enhance user experiences, and drive business efficiency.

Recognized for combining technical excellence with leadership, enabling teams to ship faster, improve code quality, and scale systems with confidence. Adept at solving complex problems, modernizing legacy systems, and turning ideas into high-impact digital products.

Education

- Bachelor of Science in Computer Science
Western Mindanao State University 2010 - 2014

Experience

Tech Lead *Ethical Brand*

- Lead development of multiple applications across web and mobile platforms.
- Architect scalable systems using Laravel, Vue.js, React, and modern frontend tools.
- Manage and optimize cloud infrastructure using:
 - DigitalOcean
 - CloudPanel
 - Cloudflare
 - Fingerprint (security & tracking)
- Implement automation workflows using n8n, reducing manual processes and improving efficiency.
- Integrate OpenAI APIs into applications for intelligent features and automation.
- Oversee CI/CD pipelines, deployment strategies, and server performance tuning.
- Mentor developers and enforce coding standards, improving code quality and delivery speed.

Language/Tools: Laravel, Vuejs, Tailwind, MySQL, Dart, Git, Postman

Full Stack Developer *King Business Services*

- Translate the design into a web application and its functionality.
- I write application-level code to interact with Web Services using NextJS & ReactJS.
- Deploy applications into Vercel or Replit.
- Implement the database structure by following the company's standardization using PostgreSQL.
- Reviewed code, debugged problems, and corrected issues.
- Worked with back-end developers to design APIs.
- Inspected equipment, assessed functionality, and optimized controls.
- Participated in requirements gathering to solidify prerequisites and determine the best technical solution to meet business needs.
- Developed functional databases, applications, and servers to support websites on the back end.
- Optimized web applications for speed, scalability, and security.
- Planned and engineered RESTful web services to manipulate dynamic datasets.
- Developed user-oriented visuals and features using front-end languages to increase site traffic.

– **Language/Tools:** ReactJS, NextJS, Postgres, Git, Postman

🔧 CORE EXPERTISE

- Full Stack Development (Laravel, Vue.js, React, Next.js)
- System Architecture & API Design (REST, scalable services)
- Cloud & DevOps (DigitalOcean, CloudPanel, Cloudflare)
- Automation & Integrations (n8n, Webhooks, 3rd-party APIs)
- AI Integration (OpenAI APIs, intelligent workflows)
- Database Design (MySQL, PostgreSQL)
- Mobile App Support & Backend Integration
- Performance Optimization & Security
- Team Leadership & Agile/Scrum

Senior Full Stack Developer

Wow Brand LLC (USA)

- Translate the design into a web application and its functionality.
- I write application-level code to interact with Web Services using Laravel & VueJS.
- Implement best practices for multi-tenancy standard based on documentation.
- Implement the database structure by following the company's standardization.
- Worked in the scrum process, attending daily stand-up and completing tasks.
- Reviewed code, debugged problems, and corrected issues.
- Worked with back-end developers to design APIs.
- Collaborated with fellow engineers to evaluate software and hardware interfaces.
- Inspected equipment, assessed functionality, and optimized controls.
- Participated in requirements gathering to solidify prerequisites and determine the best technical solution to meet business needs.
- Developed functional databases, applications, and servers to support websites on the back end.
- Optimized web applications for speed, scalability, and security.
- Planned and engineered RESTful web services to manipulate dynamic datasets.
- Developed user-oriented visuals and features using front-end languages to increase site traffic.
- Employed coding practices based on commonly accepted standards to establish site layout and user interface.
- Developed user-friendly web forms with validation and error handling.
- Reviewed code to validate structures, assess security, and verify browser, device, and operating system compatibility.

– **Language/Tools:** Laravel, Vuejs, HTML5, Bootstrap, GIT & MySQL

Senior Full Stack Developer

Raging River ICT (Philippines)

- Translate the Figma design into a web application.
- Involved in writing application-level code to interact with Web Services using Laravel & VueJS.
- Participating in API documentation using Postman to be used by mobile developers.
- Worked in the Scrum process, attending daily stand-up and completing tasks in sprints.
- Reviewed code, debugged problems, and corrected issues.
- Worked with back-end developers to design APIs.
- Collaborated with fellow engineers to evaluate software and hardware interfaces.
- Inspected equipment, assessed functionality, and optimized controls.
- Participated in requirements gathering to solidify prerequisites and determine the best technical solution to meet business needs.
- Developed functional databases, applications, and servers to support websites on the back-end.
- Optimized web applications for speed, scalability, and security.
- Performed unit testing of web applications and troubleshooting issues.
- Planned and engineered RESTful web services to manipulate dynamic datasets.
- Employed coding practices based on commonly accepted standards to establish site layout and user interface.
- Developed user-friendly web forms with validation and error handling.
- Reviewed code to validate structures, assess security, and verify browser, device, and operating system compatibility.

– **Language/Tools:** Laravel, VueJS, HTML5, Bootstrap, GIT & MySQL

Senior Full Stack Developer

Australian Investment Education Inc

- Develop applications built with Laravel and VueJS, and design the database structure
 - Implement best practices for security implementation
 - Implement SMS and email validation
 - Deploy the application from the local to the server using cPanel
 - Implement code standards for readable and easy to maintain
 - Find and help fix stability, scalability, performance, cross-browser compatibility, web standards, and interoperability issues.
 - Analyzed existing software implementations to identify areas requiring improvement.
 - Worked with back-end developers to design APIs.
 - Discussed project progress with customers, collected feedback on different stages, and directly addressed concerns.
 - Developed unit test cases for testing and automation.
 - Provided software application engineering and maintenance for the development lifecycle. Inspected equipment, assessed functionality, and optimized controls.
 - Oversaw and implemented automated build and deployment pipelines.
 - Performed unit testing of web applications and troubleshoot issues.
 - Employed coding practices based on commonly accepted standards to establish site layout and user interface.
 - Conducted unit testing to deliver optimal browser functionality.
- **Language/Tools:** Laravel, VueJS, jQuery, MySQL, Git

Full Stack Developer

Med4care (Italy)

- Implement backend APIs for various web apps using Laravel.
 - Implement SPA for patient questionnaires using VueJS.
 - Participate in creating multiple web applications for patients and doctors.
 - Implement and apply code standards and permissions set by the company.
 - System Support and maintenance, debugging and fixing bugs, solving issues.
 - Coordinated deployment of new feature updates and fixes.
 - Created proofs of concept for innovative new solutions.
 - Designed and developed forward-thinking systems that meet user needs and improve productivity.
 - Built databases and table structures for web applications.
 - Tested troubleshooting methods and documented resolutions for inclusion in the knowledge base for support team use.
 - Estimated work hours and tracked progress using Scrum methodology.
 - Conducted data modeling, performance, and integration testing.
 - Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs, and enhancements.
- **Language/Tools:** Laravel, VueJS, HTML5, Bootstrap, GIT & MySQL

Full Stack Developer

BNB Financials Inc (USA)

- Implement features like auto-compute for revenue and other computations that need automation.
 - Implement 3rd party applications to use in other features of the applications.
 - Implement the code standard set by the company.
 - Implement code documentation to easily address whenever something is not right in particular methods.
 - Ensuring that the code is working before pushing it to the repository.
 - Implement bug fixing, finding issues, and possible issues in the future
- **Language/Tools:** Laravel, Vuejs, jQuery, MySQL, Ajax, Git
